Journal of Fluid Mechanics Volume 505 **25 April 2004**

L. Lacaze, P. Le Gal & S. Le Dizès	Elliptical instability in a rotating spheroid	1
V. M. Gryanik, H. Borth & D. Olbers	The theory of quasi-geostropic von Kármán vortex streets in two-layer fluids on a beta-plane	23
M. G. Blyth & C. Pozrikidis	Effect of surfactants on the stability of two-layer channel flow	59
V. Yakhot	Decay of three-dimensional turbulence at high Reynolds numbers	87
M. Righetti & G. P. Romano	Particle–fluid interactions in a plane near-wall turbulent flow	93
R. A. Antonia & P. Orlandi	Similarity of decaying isotropic turbulence with a passive scalar	123
T. J. Bridges	Superharmonic instability, homoclinic torus bifurcation and water-wave breaking	153
J. R. Lister	Thermal winds forced by inhomogeneous boundary conditions in rotating, stratified, hydromagnetic fluid	163
J. Jiménez, J. C. del Álamo & O. Flores	The large-scale dynamics of near-wall turbulence	179
D. G. Dritschel, J. N. Reinaud & W. J. McKiver	The quasi-geostrophic ellipsoidal vortex model	201
P. L.-F. Liu & K. Al-Banaa	Solitary wave runup and force on a vertical barrier	225
A. M. Leshansky, O. M. Lavrenteva & A. Nir	The leading effect of fluid inertia on the motion of rigid bodies at low Reynolds number	235
V. Theofilis, P. W. Duck & J. Owen	Viscous linear stability analysis of rectangular duct and cavity flows	249
M. G. Worster	Time-dependent fluxes across double-diffusive interfaces	287
J. Eggers & H. A. Stone	Characteristic lengths at moving contact lines for a perfectly wetting fluid: the influence of speed on the dynamic contact angle	309
D. Fructus & J. Grue	Fully nonlinear solitary waves in a layered stratified fluid	323
I. Eames & J. C. R. Hunt	Forces on bodies moving unsteadily in rapidly compressed flows	349
D. D. Joseph & J. Wang	The dissipation approximation and viscous potential flow	365
BOOK REVIEW		
	A Practical Guide to Boundary Element Methods with the Software Library BEMLIB, by C. Pozrikidis	378
